Key Stage 3: Year 7 **ATS curriculum 2021 2022**

Overall Curriculum Goals

To empower and engage students to independently identify and use cross curricular skills including the ability to read for challenge, through a knowledge rich curriculum. Students will be equipped with learning strategies to access a range of texts alongside a range of metacognitive tools to develop their self-regulation as learners at the Blue Coat School. Our curriculum aim is that students understand both the importance of using these learning principles and in becoming autonomous learners so that all pupils of all abilities and background can successfully access the universal curriculum offer.

Our curriculum is taught through the topic of Medicine Through Time to ensure students can access and develop metacognitive study skills; the knowledge is the vehicle in which the students will access and develop a range of skills and tools to access the wider curriculum. Students will, by the end of the year, be proficient in using these learning principles and comprehension and use them confidently with a range of texts and situations across their curriculum area.

Half Term 1	Half Term 2	Half Term 3	Half Term 4	Half Term 5	Half Term 6
• Introduction to ATS • Introduction and testing for the Accelerated Reader programme **Pre-science:** • Ancient medicine • Medieval: The Black Death, 1348	• **Assessment 1** **Enlightenment**: • The Great Plague of London, 1665/66 • Enlightenment and Renaissance **18th and 19th centuries:** • Smallpox and inoculation	• Crimean War and the development of nursing • Germ theory • Victorian England: Cholera and public health • **Assessment 2**	**Modern Britain**: • World War One: this involves looking at the type of injuries caused by WW1 as well as the Chain of Evacuation as well as developments in medicine and surgery as a result of warfare	**Assessment 3** **Modern Britain:** • The development of penicillin: this involves looking at the narrative behind the discovery and impact of penicillin • The NHS: this involves looking at why the NHS was set up and what impact it has had on people's lives	**Modern Britain:** • The big picture of medicine: this involves looking at how much knowledge about causes, prevention and cure has changed over time
